Asia is expected to grow by over 5% in 2018-19, accounting for nearly two-thirds of global growth.

Trade between Hong Kong and other member economies of Asia-Pacific Economic Cooperation (APEC) accounts for some 80% of Hong Kong's external trade.

Increased protectionism and trade wars are cited the top risk to growth by the regional policy community.

Increasing trade conflicts are caused by the underlying anxiety that comes with rapid technological change and greater competition.
